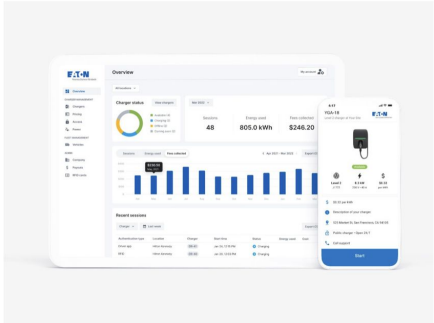
Eaton simplifies deployment and management of networked EV charging stations

February 15, 2023

- **Eaton Charging Network Manager software seamlessly and securely integrates with electric vehicle (EV) hardware upon installation**
- **Network management functionality bolsters Eaton's EV charging infrastructure portfolio for applications ranging from fleet to commercial to residential**



PITTSBURGH – As businesses, fleets, communities and individuals make the switch to zero-emission vehicles, there is a growing need for effective monitoring and management of electric vehicle charging infrastructure (EVCI). Intelligent power management company Eaton today announced the launch of its new Charging Network Manager software platform to optimize EV charging network operations from a single, intuitive dashboard. Within the online operator portal, site hosts can view and manage location and station information, driver access, payment processing, load distribution, reporting capabilities and more.

Eaton worked closely with innovative EV charging software
